GMAT Exam Preparation

About GMAT

Prepare for the GMAT exam in the best way possible in GUST campus. Our experienced trainers will guide you through the preparation of the GMAT exam in a way that will ensure boosting your score and reducing your study time.

What is GMAT?

- The GMAT is a computer-adaptive test designed to provide a common yardstick by which business school admissions committees can measure applicants and their ability to succeed in their MBA/Masters programs.
- Test scores act as a benchmark to admissions committees who are comparing the credentials of candidates from widely varying backgrounds and with different levels and areas of experience.
- Getting a strong GMAT score will increase your chances of getting into the MBA, Master's, or PhD program of your choice.

What Does the GMAT Test?

The GMAT measures general verbal, mathematical, and analytical writing skills. It also evaluates analytical skills and features both multiple-choice and essay questions. It is not a test of specific subject knowledge, nor does it assess business competence. Your GMAT score remains valid for five years.

Who Should Attend?

GMAT is a standardized test required by MBA programs, Master's programs and some PhD programs to assess if you have the foundations for success in their program. Everyone who wants to pursue his academic studies, must sit for the GMAT test.

Why is the Test Important?

Because there are many components in MBA and Graduate school applications – forms, essays and personal statements, undergrad transcripts, letters of recommendation and more – and because many of these are subjective, it is difficult to compare applicants from just those things alone. GMAT scores provide a common benchmark for every applicant, and allow admissions committees to compare the credentials of candidates from widely varying backgrounds and with different levels and area of experience.

GMAT Exam Section

Test Sections	Analytical Writing Assessment	Integrated Reasoning	Quantitative	Verbal
Time	30 min.	30 min.	75 min.	75 min.
Format	Essay	12 multiple-choice questions	37 multiple-choice questions	41 multiple-choice questions
Question Types	Analysis of an Argument	Graphics Interpretation, Two-Part Analysis, Table Analysis, Multi-Source Reasoning	Problem Solving, Data Sufficiency	Reading Comprehension, Sentence Correction, Critical Reasoning

GMAT Analytical Writing Assessment

The Analytical Writing Assessment on the GMAT helps business schools analyze your writing skills. It's scored separately from your 200-800 point score, on a scale from 0-6 in increments of 0.5. Essays are scored by a human grade and a computer grading system, and the 2 scores are averaged for your final score.

GMAT Integrated Reasoning Section

Integrated Reasoning questions are designed to resemble problems you will encounter in business school and in your career. The Integrated Reasoning section is the only section of the GMAT that gives you access to an onscreen calculator—but don't be tempted to over-rely on the calculator; IR questions are designed to test complex reasoning far more than simple computation.

GMAT Quantitative Section

The GMAT Quantitative Section is designed to test your content and analytical knowledge of basic math concepts, including arithmetic, algebra, and geometry.

The GMAT Verbal Section

The Verbal Section is designed to test your command of standard written English, your skills in analyzing arguments, and your ability to read critically.
